
maximum separation — giant receding
secondary in front
φ = 0.250, Δv = -80 km s⁻¹
to observer
near conjunction — line systems blended
secondary behind
φ = 0.530, Δv = +15 km s⁻¹
to observer
maximum separation — giant approaching
secondary in front
φ = 0.767, Δv = +79 km s⁻¹
to observer
separations to scale, discs ×1.5
primary
(K giant, 4930 K)
RV +57.3 km s⁻¹
RV +11.0 km s⁻¹
RV -20.3 km s⁻¹
secondary
(6350 K)
RV -22.5 km s⁻¹
RV +26.2 km s⁻¹
RV +59.0 km s⁻¹
blended spectrum
